

## RAIL TRANSPORTATION

Industries which require rail transportation find attractive options in Tennessee. Three major railroads traverse parts of the state: Norfolk-Southern, CSX and the Illinois-Central. Memphis is a gateway for three major railroads that serve points west of the Mississippi River. Fourteen shortline railroads serve small communities and rural areas, offering unique advantages for industries seeking locations outside of heavily urbanized areas.

The railroads that serve Tennessee provide reliable and innovative service. Major terminals operate in each large metropolitan area, and substantial investments have been made in intermodal facilities to accommodate TOFC, COFC and bulk storage transfers at several Tennessee locations.

Rail passenger service is available in Newbern and Memphis on AMTRAK's Chicago-New Orleans route. One train operates daily in each direction.

### TENNESSEE RAIL NETWORKS

Class I Railroad	Total Mileage	Shortlines	Total Mileage
1. CSX	1,309	8. Caney Fork & Western	59
